Petroleum and Natural Gas (Subvote IR05)

Objective

The basic objective is to encourage responsible development of the Province's crude oil and natural gas non-renewable resources for the benefit of the people of the Province. The specific objectives are to administer Crown petroleum (crude oil) and natural gas rights; to develop and administer royalty and tax regimes for crude oil and natural gas; to regulate the crude oil and natural gas industry by establishing and enforcing conservation and environmental standards; and to collect and distribute production and sales data and information on crude oil and natural gas reserves.

Program Delivery

This program also develops and implements Crown royalty and freehold production tax structures and incentive programs for crude oil and natural gas, including the development of regulations, to encourage crude oil and natural gas investments to be made in the province while generating appropriate benefits for the province. In addition, the program analyses markets and prices for crude oil and natural gas, and develops economic and revenue forecasts to assist with government planning. Furthermore, it develops and enforces regulations to maximize resource recovery and ensure minimal impact on the environment related to petroleum and natural gas development; and licenses wells, facilities and pipelines to ensure compliance with safety and environmental standards. It also collects, processes and stores information related to crude oil and natural gas exploration, development and production to assist in revenue collection and resource management. Finally, the program is responsible for the operation of the Oil and Gas Conservation Board. The Board is available to adjudicate industry disputes that cannot readily be resolved through the normal operation of the department.
